Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 to 14 and 16 to 19, drawn to a method of colouring porous material and coloring compositions for carrying out the method.

Group II, claim(s) 15, drawn to compounds of the formula (4).

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the groups do not share a special technical feature which defines over the prior art. The special technical feature common to Groups I and II is the capped diazonium compounds (triazenes). These compounds are known in the prior art. Note U.S. Patents 1,858,623, 1,871,850, 1,874,524, 1,882,556, 2,643,990 and 3,976,633 and Kasthurikrishnan et al. (Table 1), for example.

In addition, it would be an undue burden on the examiner if all of the claims were examined in a single application.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must

be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
